TEACHING GAME SENSE: *Coaching with Computer Games*

Dennis' practical session reflects new research on how to teach players game structure within the context of games. Watch Dennis' knowledge and expertise unfold as he turns netball into a computer game format where teams complete 'missions' and players manipulate rules in order to achieve success. The workshop is open to sports coaches of all levels; Dennis' teachings can be applied to beginner and experienced athletes of various sporting codes and are especially relevant to team sports.
